

FOR IMMEDIATE RELEASE

Austin American Technology Offers - *Cash for Clunkers*

Burnet, TX - Austin American Technology, a worldwide manufacturer of scientifically engineered batch and in-line PCB cleaning systems has decided to create its own *Cash for Clunkers* program.

While the economic indicators in this industry are not very favorable, AAT thinks that by implementing its own stimulus program we can ease the burden in the electronics industry by offering OEM's and CEM's that have outdated or technically distressed PCB cleaning equipment the opportunity to receive a rebate to apply towards a new AAT batch or inline system.

Effective immediately AAT will offer up to \$5,000.00 for any batch cleaner and up to \$10,000.00 for any inline system no matter of its original manufacturer. To take advantage of this special *Cash for Clunkers* offer, contact AAT immediately as this offer won't last forever.
