

Leading the Industry in Cleaning Technology for Over 30 Years.

Industrial Electronic Services, Inc. gets the Updated HydroJet® Inline Cleaner in their facility.

Burnet, TX January 24, 2018 – Austin American Technology installed the updated HydroJet's® Inline Cleaner at Industrial Electronic Services, Inc. Industrial Electronic Services is a woman owned business that works with clients in Military, Aerospace, Energy, Transportation, and Medical industries.

The HydroJet's® advanced cleaning system with patented drying capabilities achieves industry-best results for the class 3 high-reliability cleaning requirements needed by companies such as IES. These excellent results are accomplished in a compact 5' x 15' footprint.

After installation and training of the HydroJet's® Inline Cleaner, Tim Coleman, Director of Operations at IES, had this to say: "Our new AAT HydroJet® exceeded our cleaning expectations from day one." "The installation was painless and the training was constructive and accommodating." "AAT provides a superior cleaning process and is a valuable investment."

Andy Tressler from Process Automation and Tool had this to say about AAT: "Austin American Technology's new HydroJet® and technician both exceeded mine and my customers' expectations for on-time installation, for fast start up time and for the HydroJet's® ability to clean. In today's business climate it is refreshing to represent a company such as Austin American Technology that outperforms customer expectations. Thanks for doing what you say you will do!"
